

Weekly Results: Aug 27 - Sep 02, 2023

Total Samples = 170

Down, 86 samples:

- Average concentration of fentanyl: **10.0%**
 - Average for July: **9.9%**
- **62** samples contained fluorofentanyl
- **4** samples contained heroin with acetylcodeine and acetylmorphine
- **0** samples contained carfentanil
- **4** samples contained xylazine (median: **1.5%**)
- **59%** of samples contained benzos
 - Bromazolam, **40** samples (median: **5.3%**)
 - Etizolam, **2** samples

Cocaine (Hard & Soft), 23 samples:

- **22** samples were cocaine, no cuts detected* (2 cocaine base/hard, **20** cocaine HCl/powder)
- **1** cocaine base sample had a positive fentanyl test strip (likely due to cross contamination with samples being brought in alongside it)

Meth (Side), 8 samples:

- **8** samples were meth, no cuts detected*

MDMA / MDA, 4 samples:

- **4** samples were MDMA, no cuts detected*

Benzos, 4 samples:

- **1** sample was flualprazolam instead of alprazolam/Xanax
- **1** sample was flubromazolam instead of alprazolam/Xanax
- **1** sample was meth instead of alprazolam/Xanax
- **1** sample contained bromazolam, no cuts detected*

Other Drugs:

- **1** sample expected to be 2C-B contained 2C-B, cocaine, and phenacetin (a tylenol-like drug)
- **1** sample was 5-MeO-DiPT, no cuts detected*
- **3** samples were ALD-52 (1-acetyl-LSD), no cuts detected*
- **1** sample was N,N-Dipropyltryptamine (DPT), no cuts detected*

Other Drugs cont'd...:

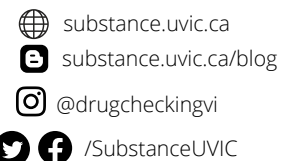

- **1** sample was DMT, no cuts detected*
- **12** samples were ketamine, no cuts detected*
- **4** samples were LSD, no cuts detected*
- **1** sample was methaqualone (Quaaludes), as expected
- **1** sample contained hydromorphone (Dilaudid), as expected
- **1** sample contained oxycodone (Oxycontin), as expected
- **2** samples expected to contain allylescaline contained allylescaline; **1** additionally contained methallylescaline
- **1** sample contained amphetamine (Adderall), as expected

Community News:

- **Down:** Brown flakes. When cooked, stayed a brown colour. Generally as expected but a little bit stronger. Felt like a benzo was present. Bought in Victoria.
- **Down:** Small green pebbles. Stayed green when cooked. When smoked, it tasted good. Generally as expected but a little bit stronger. Felt like a benzo was present. Bought in Victoria.
- **Down:** Small purple and red pebbles with powder. When cooked, turned clear. Was very harsh to smoke. Had intense, strong effects. Bought north of downtown.
- **Side:** Large clear crystal shards. When cooked, turned a clear/brown colour. Was smooth to smoke. Effects were somewhat stronger than expected but nothing unusual. Bought north of downtown.

Where to Find Us:

1802 Cook Street, Victoria, BC
Monday - Saturday, 12-7 PM
Call or text: 250 - 415 - 7637

* While no cuts were *detected*, this does not mean these samples were "pure". Impurities likely exist at concentrations below our limits of detection.
