

Weekly Results: Oct 02 - Oct 07, 2023

Total Samples = 158

Down (Opioids) & Sedatives, 92 samples

Down (Opioids) - 78 samples

- 57 samples contained fentanyl at a median concentration of 11.2% (concentrations ranged from 0.1% to greater than 80%)
- 52 samples contained fluorofentanyl at a median concentration of 8.3% (concentrations ranged from 0.2% to greater than 80%)
- 6 samples contained xylazine at a median concentration of 4.2% (concentrations ranged from 1.2% to greater than 15.4%)
- 1 sample contained carfentanil at a concentration of 0.4%
- 33% (26/78) of down samples contained a benzodiazepine
 - 22 samples contained bromazolam at a median concentration of 3.1% (concentrations ranged from less than 0.1% to greater than 80%)
 - 3 samples contained an undifferentiated benzodiazepine
 - 1 sample contained etizolam
 - 1 sample contained flualprazolam
 - 1 sample contained flubromazepam

Benzos - 5 samples

- 2 alprazolam samples contained bromazolam instead
- 1 alprazolam sample contained flubromazolam instead
- 1 flualprazolam sample contained flualprazolam
- 1 unspecified benzo sample contained bromazolam

Stimulants, 38 samples

Crack & Cocaine - 15 samples

- 10 samples were cocaine, no cuts detected*
- 1 sample contained cocaine in addition to lidocaine
- 3 samples were crack, no cuts detected*
- 1 sample contained crack and phenacetin

Methamphetamine - 7 samples

- 6 samples contained meth, no cuts detected*
- 1 sample contained crack instead of meth

Stimulants Continued

MDMA/MDA - 15 samples

- 10 samples were MDMA, no cuts detected*
- 1 sample contained MDMA in addition to MDA
- 4 samples were MDA instead of MDMA

Psychedelics & Dissociatives, 13 samples

Psychedelics - 9 samples

- 3 samples contained 2C-B, no cuts detected*
- 1 sample contained 4-AcO-DMT, no cuts detected*
- 1 sample contained 4-HO-MET, no cuts detected*
- 1 sample contained 5-MeO-MiPT, no cuts detected*
- 1 sample contained ALD-52, no cuts detected*
- 2 samples contained methallylescaline, no cuts detected*

Dissociatives - 3 samples

- 3 samples contained ketamine, no cuts detected*

Community News

This week

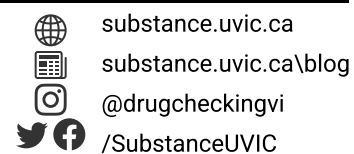

- **Down:** large tan/brown chunks. When cooked, turned a light reddish/rust colour. When smoked, had a very strange taste. Contained benzos. Somewhat stronger than expected, but enjoyable effects! Bought downtown

Sep 11-16th

- **Down:** Small light pink pebbles and powder with darker pink spots. Reporter notes that it was sold as non-benzo down but felt very benzo heavy. Had much stronger effects than expected. Caused immediate drowsiness and then extended sleep. Also caused shallow and sporadic breathing. When cooked, it burns white/pink. When smoked it was nearly tasteless and melted really well. Bought north of downtown.
- **Down:** Small light blue pebbles. Had a nice taste when smoked. Overall, effects were weaker than expected. Felt like a benzo was present. Bought downtown.

Where to Find Us:

1802 Cook St, Victoria, BC
Monday - Saturday, 12 - 7PM
Call or text: 250-415-7637

* While no cuts were detected, this does not mean these samples were "pure". Impurities likely exist at concentrations below our limits of detection.
