

Weekly Results: Dec 11 - Dec 16, 2023

Total Samples = 147

Down (Opioids) & Sedatives, 76 samples

Down (Opioids) - 66 samples

- 56 samples contained fentanyl at a median concentration of 13.9% (concentrations ranged from 0.2% to greater than 80%)
- 44 samples contained fluorofentanyl at a median concentration of 7.6% (concentrations ranged from 0.6% to greater than 40%)
- 7 samples contained heroin at a median concentration of 4.3% (concentrations ranged from 2.1% to greater than 80%)
- 1 sample contained carfentanil at a concentration of 0.37%
- 56% (37/66) of down samples contained a benzodiazepine
 - 30 samples contained bromazolam at a median concentration of 7.5% (concentrations ranged from less than 0.2% to 15.4%)
 - other benzos detected include: undifferentiated benzodiazepine, etizolam, flubromazepam, and flubromazolam

Opioid - Other - 8 samples

- 63% (5/8) of Opioid - Other samples were as expected*
- 2 samples expected to be Hydromorphone could not have any actives detected
- 1 sample expected to be Percocet contained fentanyl or a fentanyl analogue instead

Depressant - Other - 2 samples

- 2 samples contained GHB as expected*

Stimulants, 45 samples

Crack & Cocaine - 18 samples

- 94% (17/18) of crack/cocaine samples were as expected*
- 1 sample contained levamisole, in addition to cocaine

Methamphetamine - 10 samples

- 100% (10/10) of methamphetamine samples were as expected*

MDMA\MDA - 9 samples

- 100% (9/9) of MDMA\MDA samples were as expected*

Stimulants Continued, 45 samples

Other - 8 samples

- 25% (2/8) of Stimulant - Other samples were as expected*
- 1 sample contained 3-CMC instead of 3-MMC
- 1 sample contained 3-MMC instead of 3-CMC
- 1 sample contained 4-CMC instead of 4-MMC
- 1 sample contained methamphetamine instead of Adderall
- 2 samples expected to be MDPM and Modafinal respectively could not have any actives detected

Psychedelics & Dissociatives, 12 samples

Psychedelics - 4 samples

- 100% (4/4) of Psychedelic samples were as expected*

Dissociatives - 8 samples

- 100% (8/8) of Dissociative samples were as expected*

Community News

- **Down:** Large purple chunks. Smelled okay when smoked, produced a dark brown resin. Effects were somewhat weaker than expected. Purchased in Harris Green area.
- **Cocaine (HCl/powder):** Fine white powder. Effects as expected, nothing unusual or unexpected to report. Purchased in the Harris Green area.
- **Down:** Small purple pebbles. When it was cooked it congealed quickly. When it was smoked, it melted well and produced a brown resin. Felt like a benzo was present, but effects were weaker than expected. Bought downtown.
- **Side:** Clear/cloudy crystal shards. When smoked, it had a sour taste. Effects were much weaker than expected. Possibly felt like a benzo was present, was not stimulating. Bought downtown.
- **Down:** Small purple chunks. When smoked, tasted like dope, melted like dope, produced a thick resin. Effects just as expected. Bought around town.
