

SUBSTANCE WEEKLY REPORT

June 3 - June 9, 2024 (199 Samples)

HIGHLIGHTS

- We are excited to share our new and improved weekly report format!
- This week, 64.8% (129/199) of samples tested were as expected, with no cuts or adulterants detected.
- Many of us went to Other World this past weekend and had a blast drug checking, harm reduction-ing, dancing, camping, connecting, and vibing! We checked 113 samples, which are not included in this report. Check out our festival report, which comes out later this year, to learn more.

DOWN/OPIOIDS, 78 SAMPLES

- 60 samples contained **fentanyl** at a median concentration of 11%
- 9 samples contained **fluorofentanyl** at a median concentration of 5%
- 9 samples contained **ortho-Methyl fentanyl** at a median concentration of 5%
- 2 samples contained **xylazine** at a median concentration of 0.3%
- 2 samples contained **heroin** at concentrations of 15% and 28%
- 0 samples contained **nitazenes**
- 0 samples contained **carfentanil**
- 13/78 down samples contained a benzo. 12 samples contained **bromazolam**, 1 contained **flubromazepam**, and 1 contained an **unknown benzo**

Community Reporting

- **Down:** Large white chunks. Smoked well, had a nice taste. Effects were somewhat stronger than expected, felt like it was pretty strong with benzos.
- **Down:** Purple powder with larger chunks. Was smooth when smoked but had a strong flavour, and produced a brown resin. Effects were weaker than expected. Bought downtown.

BENZOS, 4 SAMPLES

- 1 sample was **Rilmazafone**
- 1 sample was **Avizafone**
- 2 **Alprazolam (Xanax)** samples were bromazolam instead

DISSOCIATIVES & PSYCHEDELICS, 36 SAMPLES

- 15/16 samples were **ketamine**
- 1 **ketamine** sample also contained **MDA**
- 1 sample was **O-PCE**
- 1 sample was **25C-NBOMe**
- 3 samples were **2C-B**
- 1 sample was **2C-D**
- 1 sample was **3C-P**
- 1 sample was **4-HO-DiPT**
- 2 samples were **DMT**
- 3 samples were **LSD**
- 1 sample was **Tucibi ("Pink Cocaine")**
- 1 **5-MeO-DMT** sample also contained an unknown
- 1 **DOM** sample also contained an unknown
- 3 samples did not have any actives detected

SUBSTANCE WEEKLY REPORT

June 3 - June 9, 2024 (199 Samples)

"UNKNOWN", 9 SAMPLES

- 9 samples were brought in as "unknown"
- 5 samples had actives detected
- 4 samples did not have actives detected

STIMULANTS, 62 SAMPLES

- 17/21 samples were **cocaine** (hard and soft)
- 4 **cocaine** samples also contained **levamisole**
- 32/37 samples were **MDMA/MDA**
- 3 samples contained both **MDA** and **MDMA**
- 1 **MDMA** sample also contained **meth**
- 1 sample was **2-MMC**
- 1 sample was **Amphetamine**
- 2 **amphetamine** samples were **meth** instead

Community Reporting

- **Meth/side:** Clear/white crystals shards. When cooked, turned clear. Was great to smoke, easy and had a nice clean taste. Effects were somewhat stronger than expected, reporter describes it saying "an excellent product". Bought north of downtown.
- **Cocaine base/rock:** Small white pebbles. When smoked, produced an oily resin. Effects as expected, nothing unusual to report. Bought in the Pandora area.

OTHER DRUGS, 10 SAMPLES

- 2 samples were **GHB**
- 1 **GHB** sample also contained **GBL**
- 1 sample was **Gaboxadol**
- 3 samples were **Dilaudid**
- 1 sample was **Oxycodone**
- 1 sample was **Dilaudid** instead of **Percocet**
- 1 **Tadalafil** sample also contained **Sildenafil**

REPORT GLOSSARY

- **Median:** Like an average, but accounts for outlying results so the final number isn't skewed.
- **No cuts or adulterants detected:** This does not mean these samples were "pure". Impurities likely exist at concentrations below our limits of detection.
- **No actives detected:** We could not detect any active ingredients within our PSMS target list.
- **Percentages:** Represents the amount of active ingredient per 100 mg. For example, a concentration of 12% fentanyl would mean 12 mg of fentanyl per 100 mg (a point) of the total sample (including other components like cuts).
