Community Reporting

- **Meth/side:** Cloudy crystal shards. Was smooth when smoked, wasn't bitter. Effects were as expected. Bought downtown.
- **Meth/side:** Clear crystal shards. When smoked, it heated well, tasted like dill pickles. Effects as expected, nothing unusual to report.

REPORT GLOSSARY

- **Median:** Like an average, but accounts for outlying results so the final number isn't skewed
- **No cuts or adulterants detected:** This does not mean these samples were "pure", impurities likely exist at concentrations below our limits of detection
- **No actives detected:** We could not detect any active ingredients within our PSMS target list
- **Percentages:** Represents the amount per 100 mg, for example, a concentration of 12% fentanyl would mean 12 mg of fentanyl per 100 mg (a point) of the total sample (including other components like cuts)
- **Tucibi:** "pink cocaine" or "tucibi", commonly confused with or sold in place of 2C-B is often a mixture of ketamine, MDMA, and cocaine
