

# SUBSTANCE WEEKLY REPORT

Oct 21 - Oct 27, 2024 (133 Samples)

## HIGHLIGHTS

- 66.2% (88/133) of samples checked were as expected, with no cuts or adulterants detected
- 33.3% (15/45) of down samples contained a benzo this week

## DOWN/OPIOIDS, 45 SAMPLES

- 32 samples contained **fentanyl** at a median concentration of 8%
- 10 samples contained **fluorofentanyl** at a median concentration of 11%
- 9 samples contained **ortho-Methyl fentanyl** at a median concentration of 3%
- 4 samples contained **xylazine** at a median concentration of 0.4%
- 2 samples contained **heroin** at concentrations of 0.7% and greater than 50%
- 1 sample contained **carfentanil** at a concentration of 0.1%
- 15/45 down samples contained a **benzo**
  - 15 samples contained **bromazolam** at a median concentration of 3%

### Community Reporting

- **Down:** Light pink powder. Writer notes that it was a bit wet when purchased so it took longer to melt when cooked. When smoked, it had a very weak taste - barely any taste at all. Effects were much weaker than expected, didn't have much of an effect. Bought downtown.
- **Down:** Large white chunks. Purchased already in rig, so unsure of cooking experience. Overall effects felt as expected but did end up causing an overdose. Bought north of downtown.
- **Down:** Small purple pebbles. When smoked, had a very strong flavour. Effects were somewhat stronger than expected, felt like benzo-dope. Bought north of downtown

## BENZOS, 1 SAMPLES

- 1 sample was **bromazolam**

## DISSOCIATIVES & PSYCHEDELICS, 22 SAMPLES

- 18/18 samples were **ketamine**
- 1 sample was **1cP-LSD**
- 1 sample was **2C-B**
- 1 sample was **2C-B** and **ketamine**
- 1 **4-AcO-DMT** sample also contained an unknown

## OTHER, 2 SAMPLES

- 1 sample was **zopiclone**
- 1 sample was **oxycodone (Oxycontin)**

## UNKNOWN, 2 SAMPLES

- 2 samples were brought in as "unknown"
  - 1 had actives detected, 1 did not

# SUBSTANCE WEEKLY REPORT

Oct 21 - Oct 27, 2024 (133 Samples)

## STIMULANTS, 61 SAMPLES

- 24/24 samples were **cocaine** (hard and soft)
- 20/23 samples were **MDMA**
  - 2 **MDMA** samples did not have any actives detected
  - 1 **MDMA** sample also contained **MDA**
- 4/4 samples were **MDMA and MDA**
- 7/7 samples were **methamphetamine**
- 1 **2-MMC** sample also contained **MDMA**
- 1 sample was **3-MMC**
- 1 sample was **modafinil**

### Community Reporting

- **Meth/side:** Clear crystal shards. Cooked as one would expect. When smoked, didn't really produce a resin. Effects as expected!

## REPORT GLOSSARY

- **Median:** Like an average, but accounts for outlying results so the final number isn't skewed.
- **Percentages:** Represents the amount per 100 mg. Example: a concentration of 12% fentanyl is 12 mg of fentanyl per 100 mg (a point) of the total sample (including other components like cuts).
- **Unknown benzo:** A benzo that is likely outside of our PSMS target list.
- **1cP-LSD:** A psychedelic that is structurally related and reported to have similar effects to LSD (acid).
- **4-AcO-DMT:** A psychedelic in the tryptamine class. It is structurally related and reported to have similar effects to psilocybin (mushrooms).
- **Modafinil:** A medication primary used to treat narcolepsy, among other sleep disorders.

## WEEKLY REPORT FEEDBACK

We are seeking feedback on the weekly report about what works and what doesn't. If you would like to contribute, please email [barclay@uvic.ca](mailto:barclay@uvic.ca) or call 250-721-6275, leave a message, and we will provide more information.
