REPORT GLOSSARY

- **Community Reporting:** These sections include reports from community members throughout Victoria. Samples within these sections may or may not have been checked at Substance.
- **Median:** Like an average, but accounts for outlying results so the final number isn't skewed.
- **Percentages:** Represents the amount per 100 mg. Example: a concentration of 12% fentanyl is 12 mg of fentanyl per 100 mg (a point) of the total sample (including other components like cuts).
- **Unknown benzo:** A benzo that is likely outside of our PSMS target list.
